Cloud Communications

Securely deploy Microsoft Teams for remote working

Remote work is enabling millions of workers around the world to stay productive, helping organizations to maintain business continuity in the face of our global health crisis.

Secure Remote Working Workshop

Enable your team to work from anywhere with a remote workshop to securely deploy Microsoft Teams. With this one-day workshop, we'll show you how you can use Microsoft Teams to:

Empower people to stay connected

- Enable people to meet and collaborate from home
- Engage people with virtual events and communications
- Make productivity applications available on any device

Maintain security and control

- Enable cloud identities with single sign-on and self-service password reset
- Secure, remote access to Microsoft Teams

Workshop outputs

The output of the Secure Remote Working Workshop will be a set of rapid response recommendations for Microsoft Teams including:

- Licensing and installation requirements
- Environmental assessment
- Recommended Teams settings
- Recommended security options to secure access
- Risk review and mitigation plan
- Comms & training plan with support resources
- Prioritised, actionable deployment plan
- Detailed next steps

This one-day workshop is delivered remotely and often includes a Change Management Practitioner, Governance Specialist and UC consultant.

This workshop enables you to **rapidly deploy remote work scenarios** to empower employees to stay connected, while **maintaining security & control.**

Prepare

Evaluate your remote work options and business implications in one workshop

Design

Goal is to enable remote work quickly, with more advanced options at a later stage

Deployment Plan

One-day workshop leaves you with a concrete deployment plan, timelines, and next actions

Goal:

Help customers rapidly deploy remote work scenarios to empower employees to stay connected, while maintaining security & control.

Scope:

Enable identity
Single sign on & self- service password reset

Rapid deployment of Teams
Guided checklists, activation, installation & configuration

Providing Teams adoption kit
End user training, workload introductions & support resources

Secure access to Teams
Applying baseline security like conditional access & MFA

Who should attend?

You will get the most benefit from this workshop by including these recommended stakeholders, from your organization:

- Project Sponsor
- Data Protection Officer
- Security Officer
- IT Office 365 Administrator
- Project Team representatives
- Business stakeholders
- IT Operations
